

ASSIGNMENT-2

R.DIVYA

VV COLLEGE OF ENGINEERING

III-YEAR CSE

(TEAM LEADER)

In the last Assignment you have created index.html and profile.html. So, now in this assignment you have create two html pages and style it using CSS.

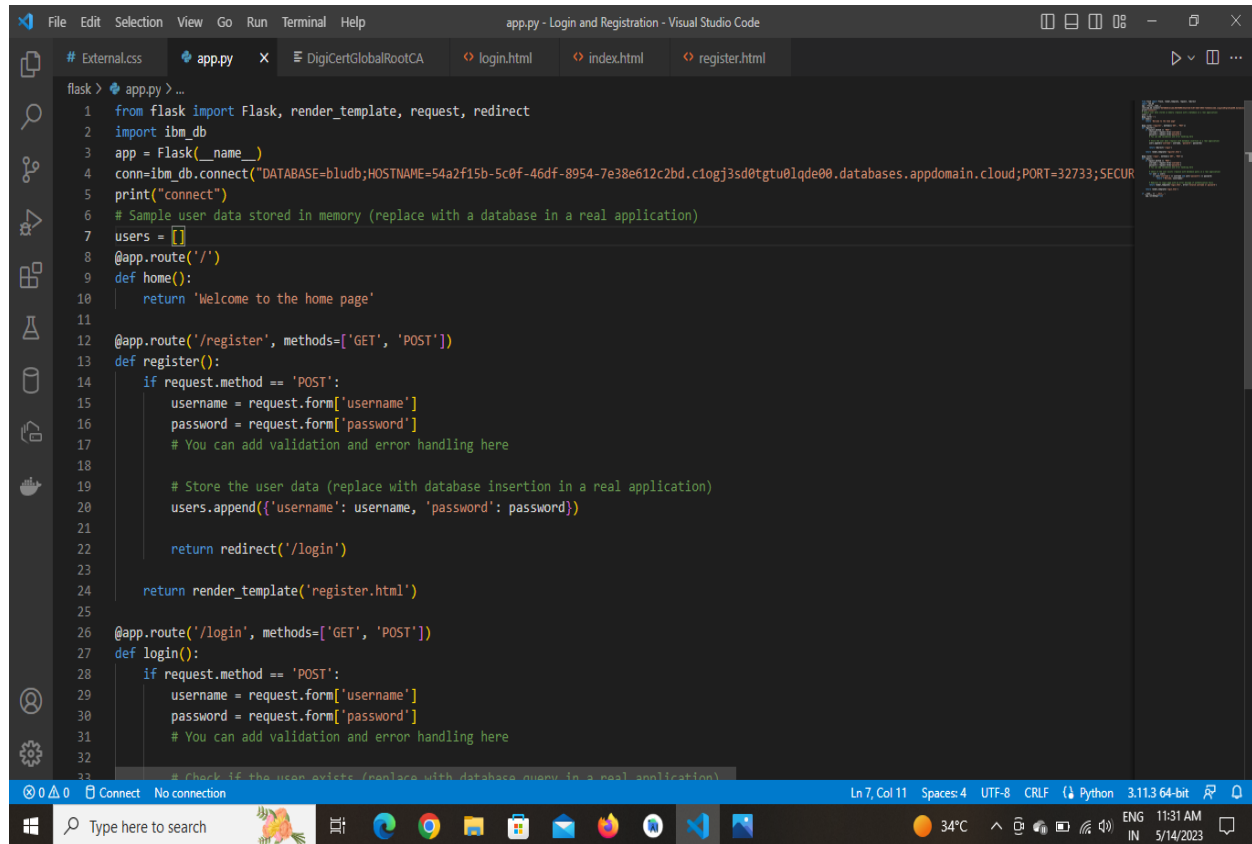

1. Login and Register html page

Task 1: You need to run the html pages in server by using Flask web framework

Task 2: Store the user registration details in IBM DB2

Task 3: while user logging in do the login validation (checking the login credentials is correct or not)

App.py:

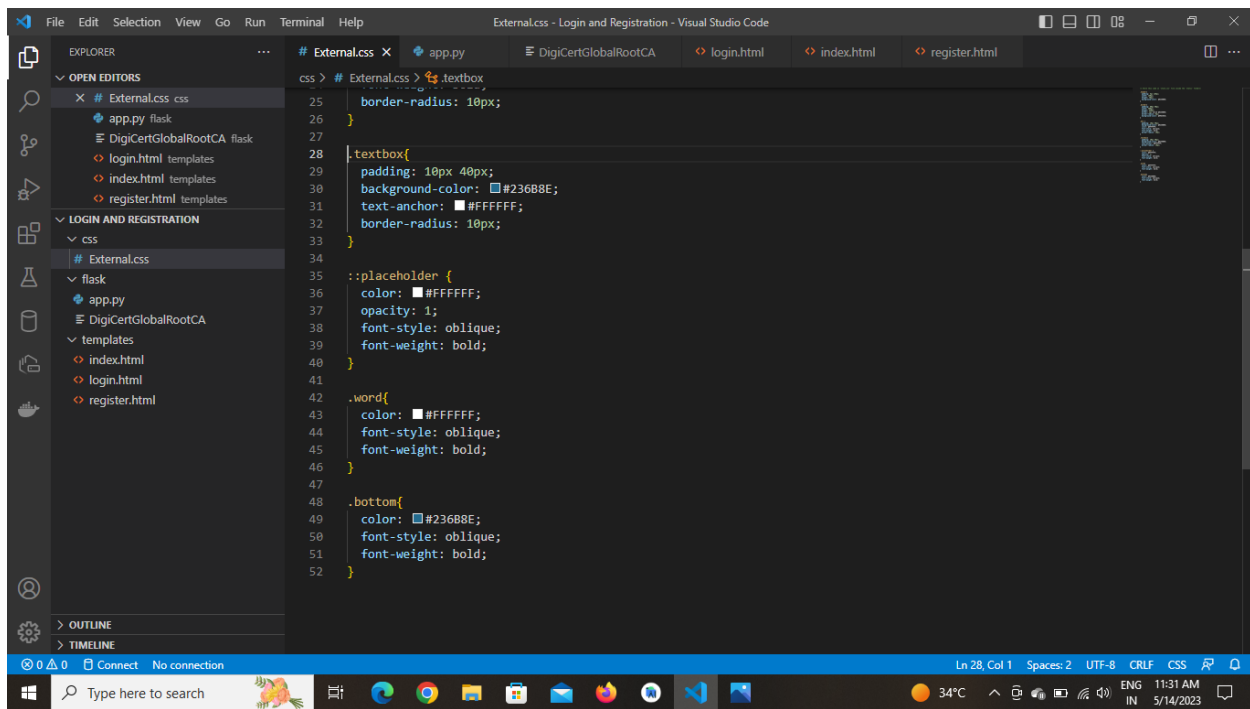

```
flask > app.py > ...
1 from flask import Flask, render_template, request, redirect
2 import ibm_db
3 app = Flask(__name__)
4 conn=ibm_db.connect("DATABASE=b1udb;HOSTNAME=54a2f15b-5c0f-46df-8954-7e38e612c2bd.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT=32733;SECUR
5 print("connect")
6 # Sample user data stored in memory (replace with a database in a real application)
7 users = []
8 @app.route('/')
9 def home():
10     return 'Welcome to the home page'
11
12 @app.route('/register', methods=['GET', 'POST'])
13 def register():
14     if request.method == 'POST':
15         username = request.form['username']
16         password = request.form['password']
17         # You can add validation and error handling here
18
19         # Store the user data (replace with database insertion in a real application)
20         users.append({'username': username, 'password': password})
21
22         return redirect('/login')
23
24     return render_template('register.html')
25
26 @app.route('/login', methods=['GET', 'POST'])
27 def login():
28     if request.method == 'POST':
29         username = request.form['username']
30         password = request.form['password']
31         # You can add validation and error handling here
32
33         # Check if the user exists (replace with database query in a real application)
```

The screenshot shows the Visual Studio Code editor with a Python file named `app.py` open. The code is a Flask application for login and registration. The editor has a dark theme, and the file explorer on the left shows the project structure with files like `External.css`, `app.py`, `DigiCertGlobalRootCA`, `login.html`, `index.html`, and `register.html`. The status bar at the bottom indicates the current line and column (Ln 7, Col 11), the number of spaces (4), the encoding (UTF-8), the line ending (CRLF), the Python version (3.11.3 64-bit), and the system temperature (34°C). The taskbar at the bottom shows various application icons and the system clock (11:31 AM, 5/14/2023).

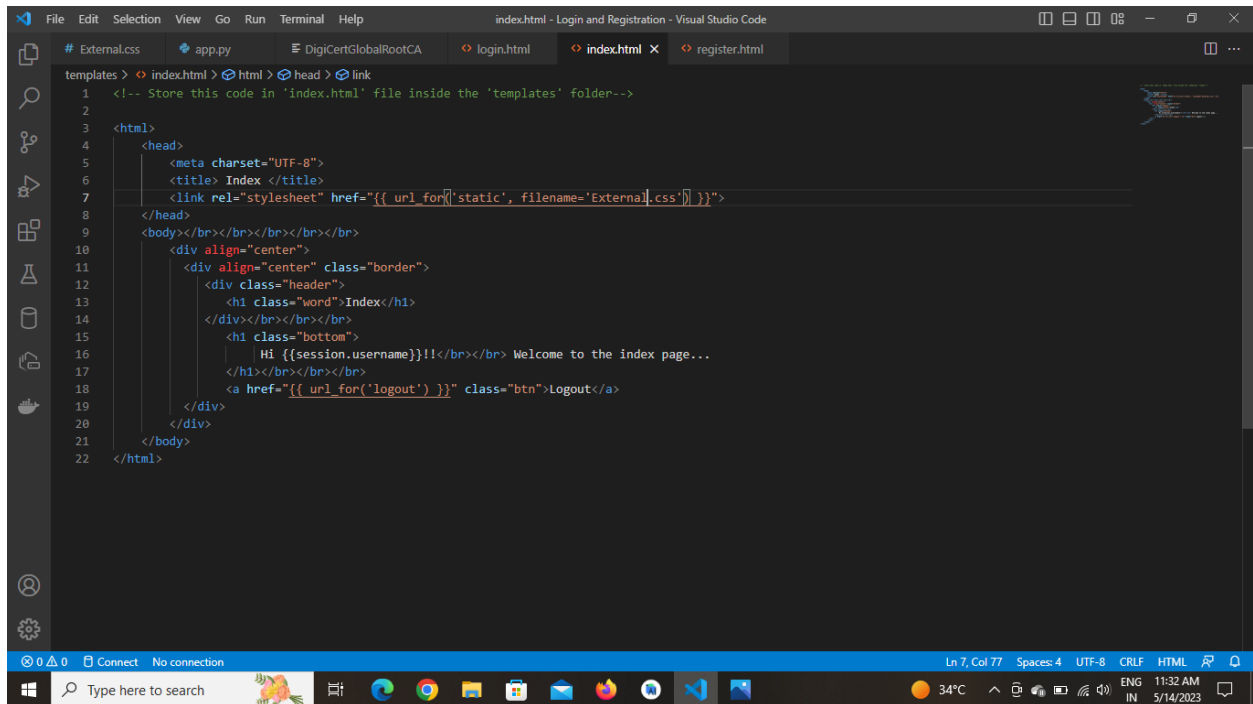

```
flask > app.py > ...
19 # store the user data (replace with database insertion in a real application)
20 users.append({'username': username, 'password': password})
21
22 return redirect('/login')
23
24 return render_template('register.html')
25
26 @app.route('/login', methods=['GET', 'POST'])
27 def login():
28     if request.method == 'POST':
29         username = request.form['username']
30         password = request.form['password']
31         # You can add validation and error handling here
32
33         # Check if the user exists (replace with database query in a real application)
34         for user in users:
35             if user['username'] == username and user['password'] == password:
36                 return f'Welcome, {username}!'
37
38         # Redirect to login page with an error message if authentication fails
39         return render_template('login.html', error='Invalid username or password')
40
41     return render_template('login.html')
42
43 if __name__ == '__main__':
44     app.run(debug=True)
45
```

External.css

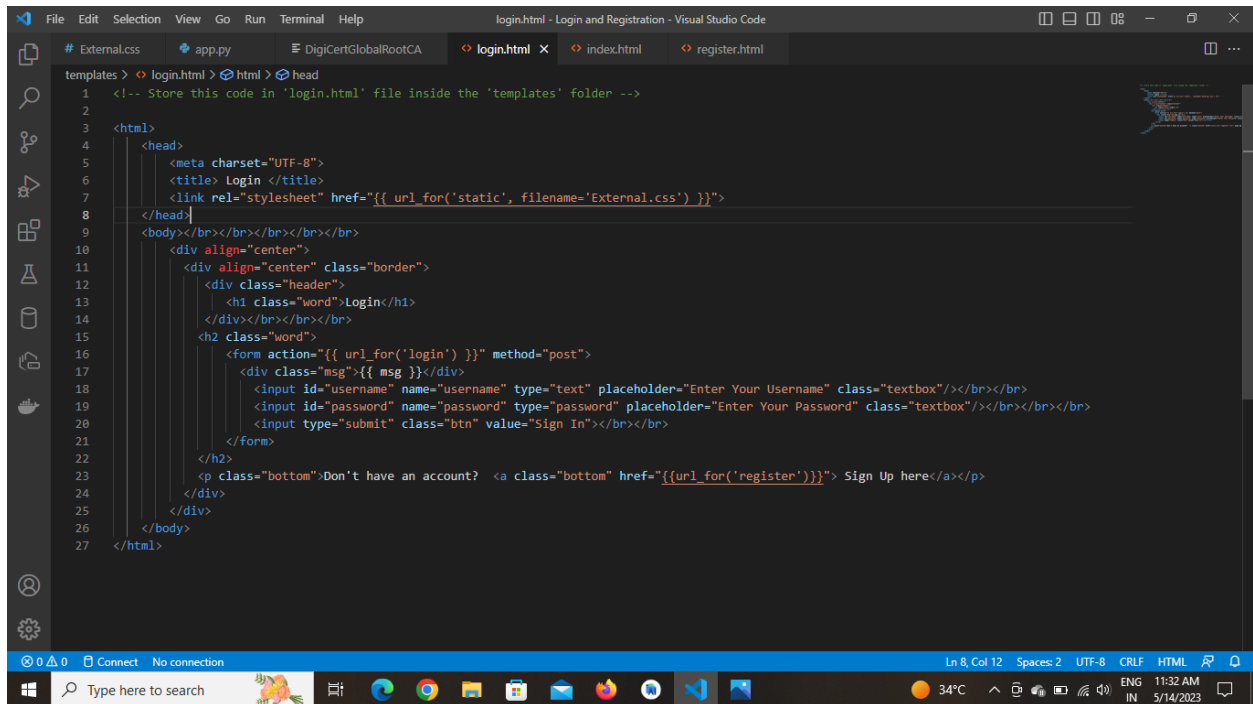

Index.html

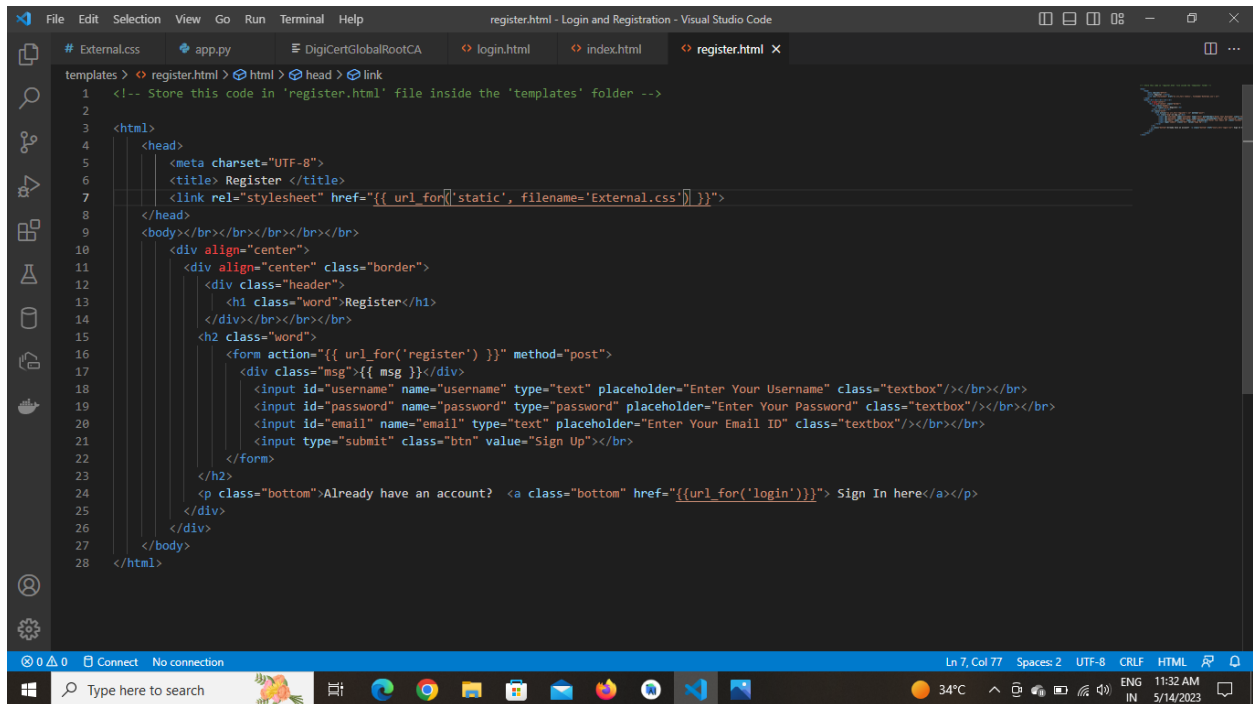

```
1  <!-- Store this code in 'index.html' file inside the 'templates' folder-->
2
3  <html>
4    <head>
5      <meta charset="UTF-8">
6      <title> Index </title>
7      <link rel="stylesheet" href="{{ url_for('static', filename='External.css')}}">
8    </head>
9    <body><br></br></br></br></br>
10     <div align="center">
11       <div align="center" class="border">
12         <div class="header">
13           <h1 class="word">Index</h1>
14         </div><br></br></br></br>
15         <h1 class="bottom">
16           Hi {{session.username}}!!<br></br> Welcome to the index page...
17         </h1><br></br></br></br>
18         <a href="{{ url_for('logout') }}" class="btn">Logout</a>
19       </div>
20     </div>
21   </body>
22 </html>
```

Login.html

```
1 <!-- Store this code in 'login.html' file inside the 'templates' folder -->
2
3 <html>
4   <head>
5     <meta charset="UTF-8">
6     <title> Login </title>
7     <link rel="stylesheet" href="{{ url_for('static', filename='External.css') }}">
8   </head>
9   <body><br></br></br></br></br>
10   <div align="center">
11     <div align="center" class="border">
12       <div class="header">
13         <h1 class="word">Login</h1>
14       </div><br></br></br></br>
15       <h2 class="word">
16         <form action="{{ url_for('login') }}" method="post">
17           <div class="msg">{{ msg }}</div>
18           <input id="username" name="username" type="text" placeholder="Enter Your Username" class="textbox"/><br></br>
19           <input id="password" name="password" type="password" placeholder="Enter Your Password" class="textbox"/><br></br></br>
20           <input type="submit" class="btn" value="Sign In"/></br></br>
21         </form>
22       </h2>
23       <p class="bottom">Don't have an account? <a class="bottom" href="{{ url_for('register') }}"> Sign Up here</a></p>
24     </div>
25   </div>
26 </body>
27 </html>
```

Register.html

```
1 <!-- Store this code in 'register.html' file inside the 'templates' folder -->
2
3
4 <html>
5   <head>
6     <meta charset="UTF-8">
7     <title> Register </title>
8     <link rel="stylesheet" href="{{ url_for('static', filename='External.css')}}">
9   </head>
10  <body><br></br></br></br></br>
11    <div align="center">
12      <div align="center" class="border">
13        <div class="header">
14          <h1 class="word">Register</h1>
15        </div><br></br></br></br>
16        <h2 class="word">
17          <form action="{{ url_for('register') }}" method="post">
18            <div class="msg">{{ msg }}</div>
19            <input id="username" name="username" type="text" placeholder="Enter Your Username" class="textbox"/><br></br>
20            <input id="password" name="password" type="password" placeholder="Enter Your Password" class="textbox"/><br></br>
21            <input id="email" name="email" type="text" placeholder="Enter Your Email ID" class="textbox"/><br></br>
22            <input type="submit" class="btn" value="Sign Up"></br>
23          </form>
24        </h2>
25        <p class="bottom">Already have an account? <a class="bottom" href="{{url_for('login')}}"> Sign In here</a></p>
26      </div>
27    </div>
28  </body>
29 </html>
```

Login page:

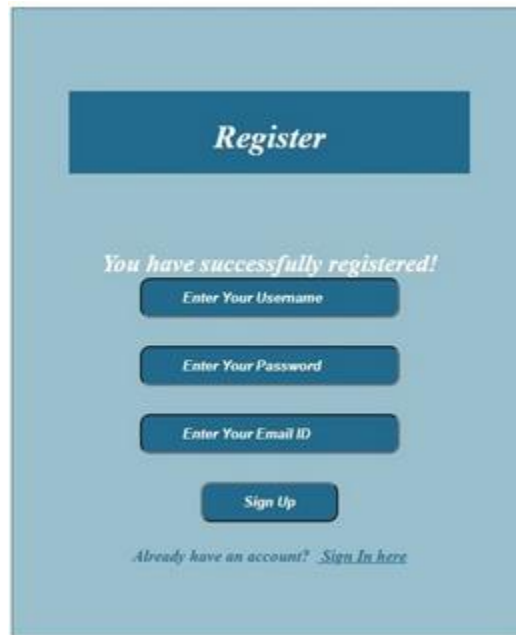

The login page features a light blue background. At the top, a dark blue rectangular box contains the word "Login" in a white, italicized serif font. Below this, there are three dark blue rounded rectangular input fields. The first field is labeled "Enter Your Username" in a small, italicized white font. The second field is labeled "Enter Your Password" in the same font style. Below these fields is a dark blue rounded rectangular button labeled "Sign In" in a small, italicized white font. At the bottom of the form, there is a line of text in a small, italicized dark blue font that reads "Don't have an account? [Sign Up here](#)".

Registration page:

The registration page features a light blue background. At the top, a dark blue rectangular box contains the word "Register" in a white, italicized serif font. Below this, there are three dark blue rounded rectangular input fields. The first field is labeled "Enter Your Username" in a small, italicized white font. The second field is labeled "Enter Your Password" in the same font style. The third field is labeled "Enter Your Email ID" in the same font style. Below these fields is a dark blue rounded rectangular button labeled "Sign Up" in a small, italicized white font. At the bottom of the form, there is a line of text in a small, italicized dark blue font that reads "Already have an account? [Sign In here](#)".

If registration successful:

A registration success screen with a light blue background. At the top, a dark blue button labeled "Register" is centered. Below it, the text "You have successfully registered!" is displayed in a bold, italicized font. Underneath this text are three dark blue buttons stacked vertically, labeled "Enter Your Username", "Enter Your Password", and "Enter Your Email ID". Below these buttons is another dark blue button labeled "Sign Up". At the bottom, the text "Already have an account? [Sign In here](#)" is displayed, with "Sign In here" being a blue link.

Database Table:

The screenshot shows the IBM Db2 on Cloud web interface. The top navigation bar includes tabs for "Service Details - IBM Cloud", "IBM Db2 on Cloud", and "IBM". The main header shows the URL "bpe61bfd0365e9u4psdglite.db2.cloud.ibm.com/crn%3Av1%3Abluemix%3Apublic%3Adashdb-for-transactions%3Aus-south%3Aa%2Fc182bbed5914f8bb9a52c024a74..." and the text "IBM Db2 on Cloud". The main content area has a sidebar on the left with icons for "SQL", "Schemas", and "Tables". The "Tables" tab is selected, showing a table named "REGISTER" in the "HJN64724" schema. The table definition is shown on the right, with columns: "Name", "Data type", "Nullable", "Length", and "Scale". The table has three rows: "USERNAME" (VARCHAR, Y, 32, 0), "PASSWORD" (VARCHAR, Y, 32, 0), and "Email ID" (VARCHAR, Y, 32, 0). A "View data" button is at the bottom right of the table definition panel. The bottom status bar shows the Windows taskbar with the search bar, taskbar icons, and system tray information including temperature (34°C), time (11:19 AM), and date (5/14/2023).

Name	Data type	Nullable	Length	Scale
USERNAME	VARCHAR	Y	32	0
PASSWORD	VARCHAR	Y	32	0
Email ID	VARCHAR	Y	32	0

If login successful:

Index page is displayed:
